

MKF-ERGIS

MKF-ERGIS is a member of ERGIS GROUP, the major producer of rigid PVC films in Central and Eastern Europe which offers a wide range of PVC and PET films as well as laminates (PVC/PE and PET/PE) intended for various applications, including:

- Pharma - blistering and ampoule packing
- Food packing
- General purpose packaging (thermoforming, blistering)
- PVC sheets

Depending on the final application MKF-ERGIS offers different types of films such as: high impact resistance films, films for deep and complicated thermoforming, films with UV protectors as well as films of formulae composed according to the demands of our customers.

Three production lines guarantee short lead time and flexibility.

MKF-ERGIS holds BRC, ISO9001, ISO 14001 and ISO 50001 certificates which prove effective implementation and application of numerous international standards concerning quality and environmental management.

Customers are our priority!

PHARMACEUTICAL FILMS:

PHARMACEUTICAL FILMS:

All PVC mono films for pharma sectors comply with the latest EU Pharmacopea and all due EU directives.

Available in the following colours:

- Transparent clear
- Transparent orange
- Transparent red
- Transparent green
- Transparent blue
- White opaque

We also offer PVC/PVDC films which are characterized by:

- High vapour and oxygen barrier.
- Excellent processability.
- Superior dimensional stability.

Pharma films of other properties (such as increased impact resistance) are available on request.

FILMS FOR TECHNICAL APPLICATIONS:

FILMS FOR TECHNICAL APPLICATIONS:

PVC and PET films for technical applications, depending on the needs and price requirements can be made of 100% virgin material or can contain a certain percentage of regrind material.

The main technical applications are:

- General thermoforming, blister packaging
- Advertising - production of labels, advertising or informative signs etc.
- Cooling tower packets (black PVC film)

We also produce PVC sheets in standard sizes (1000 x 1400 mm):

- Transparent clear (0,25 - 0,50 mm thickness)
- Transparent anti-reflex (0,20 - 0,70 mm thickness)
- White opaque (gloss/gloss) - (0,25 - 0,50 mm thickness)

Other colours and sizes are available on request and should be discussed individually.

FILMS FOR FOOD PACKING INCLUDING HIGH BARRIER FILMS

FILMS FOR FOOD PACKING INCLUDING HIGH BARRIER FILMS

PVC and PET mono films as well as PVC/PE and PET/PE laminates intended for direct contact with foodstuff produced by MKF-ERGIS comply with all due EU directives and the latest food contact requirements.

Laminates are available in peel or non-peel versions.

They are also available with additional EVOH barrier.

The standard colours are:

- Transparent clear
- White opaque
- Black opaque
- Yellow opaque
- Metallized

Other colours could be made to order.

**VACUUM SKIN PACKAGING - FRESH ERGIS® , PLASTOSKIN ERGIS FILMS®****VACUUM SKIN PACKAGING - FRESH ERGIS®, PLASTOSKIN ERGIS FILMS®**

The main purpose of skin packaging is to allow for the perfect protection of the product, and its excellent exposure on a tray.
This packaging solution prolongs the freshness of the product extending its shelf life.
Resistance to mechanical damages is an added value of the packaging.

Composition:

- TOP skin films - PLASTOSKIN ERGIS® (high barrier, high dome)
- BOTTOM films - FRESH ERGIS® - PET/PE - easy peel solution (whitening effect)
